

INTERIOR DESIGN: CODES AND BUILDING SYSTEMS COURSE

Name: ID45 Codes and Building Systems

Course Description:

This course examines building codes and building systems relative to interior design and architecture. Special emphasis is placed on international, California, and local code requirements in relation to interior design projects.

This course also explores sustainability and universal design aspects of building systems and materials in relation to codes by providing an overview of CalGreen code, ADA law, and California Title 24. This course is designed for students who are majoring in interior design, professional designers who seek to update their knowledge and those who plan to become Certified Interior Designers.

This course is currently offered at the Chaffey College Chino campus. (may also be offered online)
